

FORDLEY PRIMARY SCHOOL

Year 5 and Year 6 Family Feedback from Learning Together Mornings - 2016

- I had a fantastic morning. Certainly made me think and use my brain! Mr Chapman worked very hard to make the lesson interesting whilst controlling the class. Good to see!
- I really enjoyed coming into school with my child and was impressed at how well the whole class worked
- Very interesting. Found it a bit difficult converting from ft and inches to metres but my child seemed to manage well
- Great morning spent doing guided reading and maths. Great positive feedback from teachers to children.
- Very interesting to see how the kids learn.
- A brilliant opportunity to come and see how learning takes place in school. Really enjoyed Miss Dixon's guided reading lesson on the poem 'If'
- It's nice to spend time with my child at school. It is a big part of their day so it is good to see how they work and how they interact with others.
- I enjoyed the learning morning very much. It was nice to see in Guided Reading with Miss Dixon that most of the children were doing independent work. They were very quiet watching the video to take in all the information which made the task of answering questions quite easy. Nice there was lots of discussion before having to write tasks for the whales and against. Enjoyed this session very much. Maths was brilliant. Measures and the value of kilograms and grams which children found quite easy to do, making rice crispie cakes was a fun way of introducing the maths and the kids loved it. I found Mr Chapman's class were independent, which is great to see again.
- As a grandma I found the idea of going to school again intimidating but thoroughly enjoyed the experience. The lessons were interesting and I had no realisation of the depth of subjects covered for the age group.
